Shelf Life & Stability Testing

Please complete one form per product

Company Name	
Contact Name / Phone	
Product Name / Number	
Ingredients (no amounts required)	
Processing method (as detailed as possible, all information is handled confidentially)	
Type of packaging / container	
Hot / Cold fill	
Predicted Shelf Life	

Fera is a national and international centre of science excellence for interdisciplinary investigation and problem solving, translating research into real-world solutions across the agri-food supply chain. Fera acts as the National Reference Laboratory under Regulation (EC) No. 882/2004 for 7 areas. With a large range of testing abilities, our multi-disciplinary approach gives an overall view of any food issue you may be facing, providing you with the complete information you need to make the strong decisions needed to address these issues.
