

## LIAISON PESTICIDE APPROVALS, LABEL INFORMATION AND MRLS

Making the right decisions relies on having the right information and for those involved in the food industry, nowhere is this more true than when it comes to pesticide approvals and MRLs.

LIAISON provides growers through to retailers with quick and easy access to the information they need to make day to day decisions. It is extremely flexible and can be searched by product or crop, as well as target pest, disease, weed or other issue.

LIAISON is a rich source of information and a decision support tool for: growers, food processors, agronomists, retailers, wholesalers and testing laboratories; covering on- and off-label approvals for ALL UK-registered products. LIAISON combines our 35-year experience of crop agronomy, pesticide approvals and MRLs to save you time and give you the confidence to take decisions.

LIAISON is updated daily using pesticide approvals, manufacturers' labels and manuals. It also includes the latest Extensions of Authorisation for Minor Use (EAMUs, formerly SOLAs). All via the web for essential 24 hour, 7 day a week access.

### MRL search facility

Select a crop and LIAISON will provide you with:

- Details of active substances' UK and EU MRLs
- Dates of change (where applicable)
- Codex MRLs
- Notes relating to any known proposed changes

### Target search facility

For any target pest, disease or weed you select, LIAISON provides you with a list of approved products showing the product search details, together with:

- Active substance
- Crop/s on which it can be used
- Application method
- References to replacement products (where applicable)
- Comments regarding the best use of the product (where applicable).

### Product search facility

LIAISON provides details of products approved for use on any crop you select including:

- MAPP Number
- Active substance
- Method of application
- Application and harvest intervals
- Individual and total maximum dose levels
- Maximum residue levels
- Maximum statutory number of applications
- Final use date for this product
- Replacement product details (where appropriate)
- Label precautions

### Advanced searching

Allows you to limit your searches by:

- Marketing company
- Chemical type

- LERAP category
- Seed treatments only
- Products with arthropod buffer zone requirements
- Excluding all molluscicides
- Excluding all total herbicides
- Excluding all molluscicides and total herbicides
- Exclude all seed treatments
- Exclude all products with arthropod buffer zone requirements

### Information bulletins

An email alert subscribing service is also available and allows you to select crops you regularly look up in LIAISON and receive weekly updates on new approvals, expiries or changes to the MRLs.

I find the speed at which I can access the information within the LIAISON system to be of great value to me when I am busy, I also like the fact that all the information is on one screen for label and EAMU uses. It is also useful to have the facility of results options to add other important info such as MRLs/Harvest interval etc. to a search of products by crop, to quickly assess the most appropriate option."

**Duncan Connabeer, Technical Manager, Hutchinsons  
Crop Production Specialists**

### Parallel imports

LIAISON offers the facility to look up the reference product for any parallel import, or to list all the currently approved parallel imports for any reference product.

### Expired/expiring approvals

LIAISON allows you to check on products that have expired over the last 3 years. You can also look for any product approvals due to expire in the next 12 or 24 months.

## KEY FEATURES & BENEFITS

- MRL search & advanced search
- Product search & advanced search
- Information bulletins
