Fera is a national and international centre of science excellence for interdisciplinary investigation and problem solving, translating research into real-world solutions across the agri-food supply chain. Fera acts as the National Reference Laboratory under Regulation (EC) No. 882/2004 for 7 areas. With a large range of testing abilities, our multi-disciplinary approach gives an overall view of any food issue you may be facing, providing you with the complete information you need to make the strong decisions needed to address these issues.
