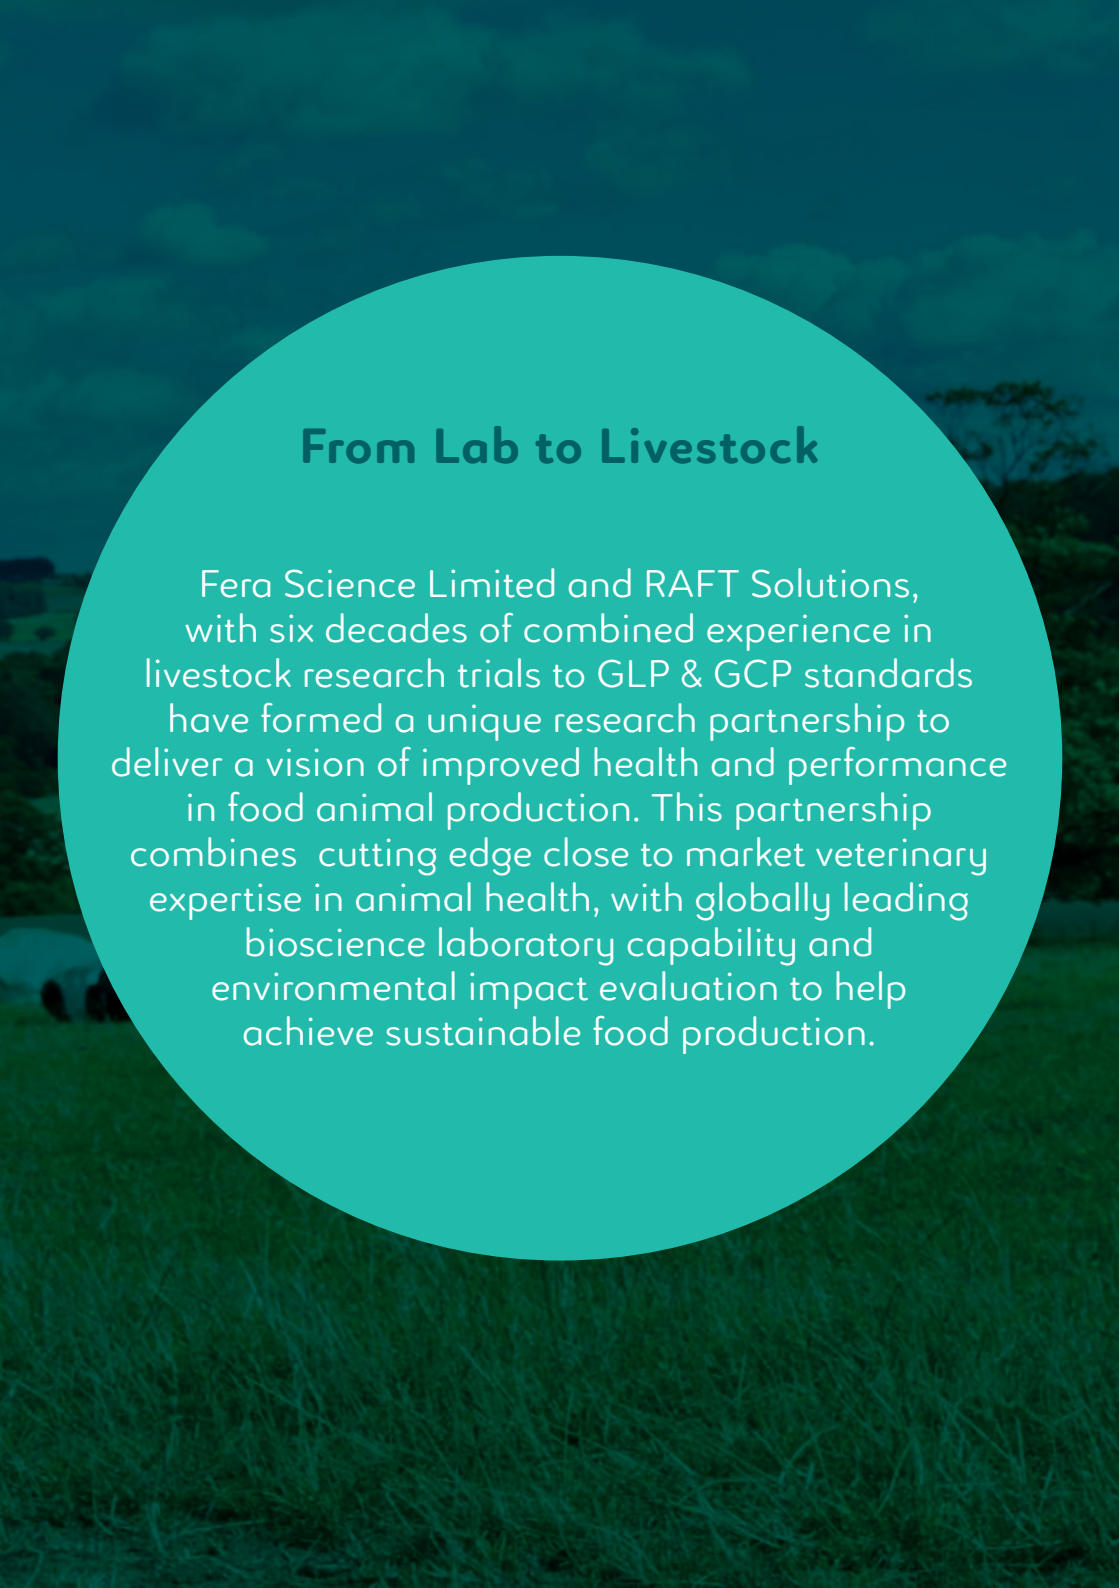
RAFT Solutions Ltd



From Lab to Livestock

Fera Science Limited and RAFT Solutions, with six decades of combined experience in livestock research trials to GLP & GCP standards have formed a unique research partnership to deliver a vision of improved health and performance in food animal production. This partnership combines cutting edge close to market veterinary expertise in animal health, with globally leading bioscience laboratory capability and environmental impact evaluation to help achieve sustainable food production.

Our specialist CRO team have a passion for animal health, a strong client focus and a track record for developing and delivering tailored innovative solutions. Our combined facilities offer extensive and flexible Good Laboratory Practice (GLP) accredited facilities suitable for all farm animal species, supported by an independently managed Quality Assurance Unit and trained Good Clinical Practice veterinary (GCPv) Study Monitors. We are proud of our reputation for outstanding service to our clients, providing robust results, timely reporting and value for money.

Our environment your products, our analysis your solution.

Using laboratory and field studies, commercial farm scale trials and environmental risk assessments our turnkey capability unlocks and maximises the potential of your new products and, extends the scope of your current veterinary medicine products. A truly bespoke service offering, either end to end across your entire program or on a targeted modular basis depending on your own internal expertise and resources that will develop, extend and deliver products truly fit for both major and minor species.

Our Philosophy

Our philosophy is to tailor our project management input to complement you and your project needs. Whether that is working on whole projects or tailor made component parts, to deliver new registrations, renew existing product licences, add additional label claims or resolve technical issues from the marketplace, to execute your existing plan or to devise a new one for you. Fera and RAFT Solutions combine to offer global expertise wherever you would like to contract out a section of the development pipeline-literally anywhere from discovery to phase 4 and beyond.

The most successful studies depend on open communication, scientific expertise, optimal resource allocation, and a commitment to proactive program management. We will provide you with a consultancy and program management service comprising our senior scientists working alongside our industry key opinion leaders, who harness years of experience to play an active role delivering your project successfully.

Our experts understand what needs to be done, who needs to do it, and when it needs to happen. And they are experienced in having those critical conversations with you to help you reach your program objectives on time and on budget.

Your submission our expertise

You need to trust that you have a reliable and experienced partner to help bring your product to market. As a leading CRO for the development and registration of veterinary medicine products, you will have access to unrivalled expertise to assist with the regulatory requirements for your veterinary medicine submissions or extensions. We have helped our customers satisfy regulations worldwide including those for the EU, EPA, JMAFF and OECD,so that means we can be with you in whichever geography you are looking to register your product.
