

Fera Science Limited ("Fera") Use of Cookies

Cookies are pieces of information that a website transfers to an individual's hard drive for record keeping purposes. Cookies make web surfing easier by saving basic contact information whilst at the Fera site. The use of cookies is standard - they are used on most websites.

Why we use cookies

By showing how and when guests use the site, cookies help Fera see which areas are popular and which are not. Many improvements and updates to the site are based on data such as total number of visitors and pages viewed. This information is most easily tracked with cookies. If you accept a cookie from www.fera.co.uk, it will not only help avoid having to fill out multiple forms as the site is traversed, but it will also help Fera to learn how to continue improving the site based on the experiences of the users.

Examples of how we use cookies:

A cookie lets the site remember that you have registered for any given site visit, which allows Fera to speed up additional activities at the site during that visit.

We do not use cookies to retrieve information from your computer that was not originally sent in a cookie.

Except as described below, Fera does not use information transferred through cookies for promotional or marketing purposes, nor is the information shared with third parties.

Fera does not use cookies to identify specific individuals, except in cases such as product demonstration registration (where a cookie allows you to register once to download a demo without registering again each time you download subsequent demos in the same session).

Most browsers are set to 'accept' cookies by default. If you would prefer, you can set your browser to refuse cookies or to alert you when cookies are being sent - however, it is possible that some parts of the site will not function properly if you do so.

For further information about how Fera uses personal data, please see our Privacy Notice at: www.fera.co.uk. By using this site, you signify your acceptance of the Fera Privacy Notice.

Fera reserves the right to make updates to its Privacy Notice at its sole discretion, and you are advised to check these conditions regularly.
